LATEST PROJECTS

[HardwareSwap](#) — React / Firebase / React Router

Buy, sell, and trade hardware with users around the country.

- Implemented Firebase to handle authentication, database storage, and comments
- Generated routes for each post with a unique post identifier

[CountryKnowledge](#) — React / Rest Countries API / React Router

Search for a country to get information such as population, bordering countries and currencies used there.

- Fetched data from Rest Countries API to grab each countries statistics and information
- Mapped through data to display each country in the form of cards with their own unique route

[Anischedule](#) — Javascript / Anilist API / SCSS / GraphQL

Retrieve upcoming, current and past anime seasons and information about each. Information includes data such as airing schedule, episode count and ratings in real-time.

- Fetched data from Anilists API with queries using GraphQL
- Auto checks for data and updates titles accordingly if they finish airing

EDUCATION

Northern Virginia Community College, Woodbridge —
Completed 30 Credits in Computer Science A.S

August 2018 - September 2019

Hylton High School, Woodbridge — *Diploma*

September 2014 - June 2018

CERTIFICATIONS

[CS50x](#) - Harvard University Intro to Computer Science
