LATEST PROJECTS

HardwareSwap — React / Firebase / React Router

Live Site: https://hardwareswap.mjdiggs.com/#/
GitHub Code: https://github.com/mjdiggs18e/HardwareSwap

- Buy, sell, and trade hardware with users around the country.
- Implemented Firebase to handle authentication, database storage, and comments
- Learned how to use React Context to pass down users information to components.
- Dynamically changed pages depending on whether or not a user was logged in.

CountryKnowledge — React / Rest Countries API / React Router

Live Site: https://countryknowledge.mjdiggs.com/
GitHub Code: https://github.com/mjdiggs18e/Country-Knowledge-React

- Search for a country to get information such as population, bordering countries and currencies used there.
- Gathered and mapped through Rest Countries API to return data on countries.
- Learned how to use React Router and create unique routes for each country.

Anischedule — Javascript / Anilist API / SCSS / GraphQL

Live Site: https://anischedule.mjdiggs.com/
GitHub Code: https://github.com/mjdiggs18e/Anischedule

- Retrieved current, past, and future anime seasons and each anime airing.
- Fetched data with GraphQL query for each anime such as air date, episode count, and description.
- Learned how to change data depending on the API response to show if an anime was finished or not.

SKILLS

❖ HTML5	❖ CSS3	❖ Javascript
❖ React	❖ SASS/SCSS	❖ Firebase
❖ Git	❖ GraphQL	❖ Bootstrap

EDUCATION

Northern Virginia Community College, Woodbridge, VA

Completed 30 credits in Computer Science A.S
August 2018 - September 2019
